Jabalpur, India

Third-year AI & ML student with expertise in Python, SQL, Machine Learning, and Data Analytics. Built end-to-end data projects and dashboards; currently seeking Data Analytics, AI/ML, or Data Engineering internships.

PROJECTS

Employee Attrition Intelligence System

- Built an end-to-end HR analytics pipeline using SQL, Python, and Power BI, enabling scalable reporting and insights.
- Developed a Random Forest attrition prediction model, achieving 88% accuracy and 0.84 F1-score through feature engineering and model tuning.
- Identified key attrition drivers and visualized insights using interactive Power BI dashboards.

Tech Stack: Python, SQL, Pandas, Scikit-learn.

SQL Data Warehouse Project

- Designed and implemented a multi-layer data warehouse (Bronze → Silver → Gold) following a medallion architecture, integrating 5+ diverse source datasets into a unified analytical layer.
- Built automated ETL pipelines for data ingestion, cleaning, and transformation, reducing manual reporting effort by an estimated 60% and enabling scalable BI reporting.
- Tech stack: SQL (CTEs, window functions, stored procedures), Data Modeling, ETL Pipeline Design

Healthcare — Patient Readmission Analysis

- Analyzed 10,000+ patient records using Python to identify key hospital readmission drivers through EDA and statistical analysis.
- Engineered clinical features and visualized patterns using Seaborn and Matplotlib, uncovering high-risk patient segments.
- Delivered actionable insights through hypothesis testing and data-driven reporting.

Tech Stack: Python, Pandas, Seaborn, Matplotlib, Statistical Analysis, Jupyter Notebook.

SQL Data Analytics Project

- Analyzed 50,000+ records using advanced SQL (CTEs, window functions, joins) to uncover customer, sales, and churn insights.
- Optimized query performance by 35% through indexing and query tuning techniques.
- Delivered business intelligence reports with actionable, data-driven recommendations.

Tech Stack: SQL, Query Optimization, Data Analysis, Business Intelligence Reporting.

30 Mini SQL Projects — SQL Proficiency Portfolio

Completed 30 structured SQL mini-projects covering data cleaning, aggregation, query optimization, joins, and window functions, demonstrating broad, hands-on data engineering proficiency.

TECHNICAL SKILLS

Languages & Querying: Python, SQL, C++

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Keras, PyTorch, Statsmodels

Tools & Platforms: Microsoft Power BI, Tableau, Jupyter Notebook, Google Colab, VS Code, GitHub, Microsoft Excel

Data Engineering: ETL Pipeline Design, Data Warehousing (Bronze/Silver/Gold), Data Cleaning, Data Modeling, CTEs, Window Functions

ML & AI Concepts: Regression, Classification, Cross-validation, Hyperparameter Tuning, Feature Engineering, Model Evaluation (Accuracy, F1, AUC-ROC), Deep Learning, NLP (basics)

Soft Skills: Communication, Critical Thinking, Teamwork, Presentation, Community Building

LEADERSHIP EXPERIENCE

Google Student Ambassador

- Selected as a Google Student Ambassador, promoting AI literacy, Google Cloud, Gemini, and AI/ML tools across a 500+ student community.
- Conducted 5+ AI/ML workshops and collaborated with faculty to drive hands-on AI adoption and community engagement.

EDUCATION

B. Tech in Artificial Intelligence & Machine Learning

Baderia Global Institute of Engineering & Management, Jabalpur

GPA: 8.79/ 10

08/2023 – Present

CERTIFICATIONS & LEARNING

Data Analytics Job Simulation by Deloitte(Forage): Issued: 2026-06-30 | Cert ID: kNHTD2JDLNgXbjtE

Python Essentials 1 — Cisco Networking Academy & Python Institute: Issued: 2026-05-30 | Cert ID: 7357ee6b-b920-4372-8c60-44a7d6ded064
